This video has been updated to reflect the latest version of python on the Windows 11 operating system.

We have also added the links for free Python tutorials in English and Hindi language in the video description.

We hope you have enjoyed the video and will see it again in the next installment of our Learn Python series.

The next episode will be on Wednesday, November 14th at 9pm ET.

[Back to the site you came From.](#)

The last episode of Learn Python was on Tuesday, November 13th at 10pm ET at the same time as this one.

Continued...

We are happy to make this available to all our readers and viewers in the U.S.

and around the world.

We would like to thank all of you for your support and interest in Learn Python.

We will see you in the future for our next Learn Python videos.

We look forward to seeing you in our next series.

Back to the page we came from, the next part of the series will be about how to run a basic program in Python with the help of the built-in tool idle.

The video will be shown in its entirety in the second half of the video.

We expect you to use idle to run python programs on your computer.

The third and final part will be a tutorial on how to use the python command line to print programs using the print method in Python to print something.

The final part of this video will focus on the use of the Python command line in running python programs.

We expect you to use python.org to print your programs.

The tutorial will also help you with the installation of python programs and other python related tools.

The fourth and final section will focus on how to manage python packages and libraries.

We want to show you how to download and install python on a Windows 11 PC.

The first step is to download the python.

exe file right click and click open to begin the installation.

The download will start it's only 26 MB.

Continued...

The second step is the installation setup.

Click install and the setup will start now.

The setup is successful click close now.

Let us go to start and verify the installation type CMD click open.
